Rubbish. Someone tried to clone StarCraft and it didn't work,. This game is a cheap clone of big pharma and factorio (coming to steam soon). It lasts maybe an hour of play then it expects you to jump through the hoop of prestiging, like in CoD or idle games. The only difference is in those games prestiging is used to extend the life of the game by forcing you to restart to earn bonuses. In this game, you restart to earn useless machines that are purely convenience.

The whole challenge in this game is derived from matching resources together to complete objectives and earn money. Once you prestige you do the exact same thing all over again, with the same knowledge of combinations. It lasts maybe an hour, and after that it's a game all about waiting. Unless you choose to install mods, this game isn't worth the price of admission.. Too short, story was pretty scatterbrained, and just in general wasn't interesting. The main character is a jerk and never really stops being a jerk, so she's not likable at all. Love interest is nothing more than a stick with boobs and a hole.

The R-18 patch isn't fantastic, either.

There are so many better Yuri games out there, and so many that are free. I can't say that this is worth your dollar.. I just started to create my character and I discovered. What Kind of joke? Limited customisation, I dont event want to try. The only thing you can change is the name and the powers.. to buggy and theres barely anyone who plays. I want to like this game, but the same strategy works on nearly every map. Slow them down, hit them with the big guns. Toss in a couple lasers for airplanes. Hellfire the final wave. Rinse and repeat.

Enemy variety comes in the form of airplanes or ground units. Ground units may look different, but the only real difference is how much health they have. All of the turrets are effective against all ground units, it's only a matter of concentrating the most damage into a small of a space as possible. Not all that hard since 6 of the 8 weapons hit multiple targets.

This is a very vanilla tower defense game. I won't say it's bad, but it's not that great either.. Useless game. It might help if it lets you get through the tutorials without crashing after every operation. Totally unplayable at the moment.. amazing game just so much fun and such a amazing story. You like Kokonoe, a lot, but she's really smart and is trying to get into the prestigious Tokyo U while you'll be lucky if you can get into any university at all. How will your love survive?

That's all this story is. About half an hour, only one choice in it. A few cheesecake shots of Kokonoe covering her breasts or seeing Kokonoe in her panties, but nothing lewd. All characters other than the protagonist are fully voiced in Japanese, which is nice. Overall it's a short, lightweight, unremarkable visual novel.

Oh, and Kokonoe is a grasshopper girl. Somehow this doesn't figure into the story at all.. Fly away and be freeeee! (FYI, trailers are in 3rd person, but the game IS in 1st.) This game is pretty sweet, and will hopefully be getting even cooler.

How to buy again?. I can see why everyone dislikes this game. Game runs smooth and looks impressive but flickering grey every few seconds on DK2 so i can't give it a thumbs up sorry maybe it's my rig but it's the first time i have had any problems running vr games :( No variety of levels or atmosphere. Potential though.

Unfortunately, no updates since August. Hopefully this isn't dead. If it was actively developed still I'd say go for it. The tactical view is actually amazing.

But looking at how big the campaign is, if this is as much as the game will ever offer, it's not worth it's current price of \$20 as of Feb 2016.. Well it's pretty good except for the fact that there's only six maps and you can't be black unless you pay ten bucks for the six ♥♥♥♥♥♥ maps. ;)

**Update:**

Fixed issues with Upper Baetus when playing as Carthaginians.

Fixed issues with Ticinus River and Upper Baetus when playing as Romans.

Any problems let us know at [support@hexwar.com](mailto:support@hexwar.com). **Update:**

We have just updated the game with what we hope is a fix for the random crashes.

This is proving to be a difficult bug to track down hopefully this patch has solved the issue but we will be keeping a close eye on it.

Please let us know at [support@hexwar.com](mailto:support@hexwar.com) if you still have issues.
